Children With Birth Injuries

ACCESS RESOURCES - GET THE HELP FAMILIES NEED

At Help Your Baby, we are proud to be legal advocates for children with birth injuries such as Cerebral Palsy. Even in cases where there is no liability or negligence, we help families get the resources and support they need - ***and there's never an out of pocket charge for our services.***

MEDICAL MISTAKES ARE SELDOM ACKNOWLEDGED

Most people don't realize a common cause of Cerebral Palsy is from medical mistakes during pregnancy or childbirth. Hospitals, physicians and other healthcare workers seldom point out their mistakes to families of injured children. It's also not uncommon for medical professionals to allow families to feel as if the family is responsible for the birth injury or to create the impression the injury was "An Act of God."

WE OFFER NO COST RESOURCES

Even well meaning healthcare workers are often not knowledgeable on where to send CP families for help. We have even seen cases where families of CP children were allowed to take their child home from the hospital with the only instruction being to "Learn CPR."

Even if years have passed since the birth of a child with CP, we may be able to help find the cause - and get the child and their family the help and resources they need.

FREE RESOURCES

CP families often do not know where to turn to seek the resources they need to help their children - so the children often do not receive the care they deserve. At Help My Baby, we help ALL families who contact us. We have compiled a comprehensive list of programs and services from across the nation that can help families - free of charge.

THREE STEP NO COST PROCESS

If we suspect a child was the victim of medical negligence, with no up front fees, we:

1. Investigate each case.
2. Review the details of each case with our own network of medical professionals as well as our own legal professionals.
3. With the permission of the child's parents or guardians we then represent the child through each step of the process.
